

Thermo/Probes, Inc.
Thermowell Mfg Co.
55 Lyerly, Suite #214
Houston, Texas 77022

I am excited to share with our valued customers that we have a new member at the Thermo/Probes, Inc. team. My grandson, Brandon Moon will be transitioning with me as I plan for retirement. Our primary focus during this time is that our customers continue to receive the quality and service that they have come to expect. I will continue to be involved on an "as-needed" basis and will be available to support our customers.

Brandon earned a B.S. Mechanical Engineering degree from Texas Tech University and a Masters of Business Administration from University of Houston. Prior to Thermo/Probes, Inc., Brandon supported the Oil and Gas Industry as a Reliability Consultant with Petrofac Limited. Before that, he was a Maintenance Engineer at a LyondellBasell Industries chemical plant. Brandon will be using his field experience in Research and Development, Petrochemical, and Oil and Gas Industries to uphold our motto:

"Quality and Delivery – Right Now, Right Every Time"

Please contact me if you have any concerns. We are excited for the opportunities that the future holds. We fully understand that we would not have survived for 34 years without a great relationship with our customers. Thank you.

Sincerely,

Andy K. Hooper, Founder and President
